

Network Device Interpretation # 202607

Request to add PP Module for LiFi Access Systems v1.0

to NDcPPv4.0 and Firewall Allowed-With Lists

Status: *Active* *Inactive*

Date: 22-Apr-2026

End of proposed Transition Period (to be updated after TR2TD process): N/A

Type of Change: Immediate application Minor change Major change

Type of Document: *Technical Decision* *Technical Recommendation*

Approved by: *Network iTC Interpretations Team* *Network iTC*

Affected Document(s): NDcPP v4.0, NDSD v4.0

Affected Section(s): All

Superseded Interpretation(s): None

Issue:

NIAP would like to have a PP Module added to the NDcPPv4.0 allowed-with list. We'd like to have to have the following added: PP-Module for LiFi Access Systems v1.0. Specifically, we'd like for LiFi to be allowed for use with NDcPP and also with the NDcPP/Firewall combination.

Proposed resolution:

See above

Resolution:

The NIT agrees that the PP Module for LiFi Access Systems v1.0 should be added to the NDcPPv4.0 and Firewall Allowed-With Lists. These lists will be updated accordingly.

Rationale:

This is needed to support network device TOEs that include LiFi functionality.
